VR Systems Introduces Upgraded EViD WebMonitor™ to Ensure Smooth Voting Process

TALLAHASSEE, Fla. – August 1, 2018 – VR Systems has recently introduced a new WebMonitor for its popular EViD electronic pollbook product line that provides instantly accessible precinct data to ensure a smooth voting process. The new EViD WebMonitor will make it easier for elections managers to address concerns and maintain optimum performance at all polling locations on Election Day or during Early Voting.

The new robust WebMonitor design offers a high-level overview of the health of polling locations so that election staff can quickly determine matters that require attention and facilitate prevention before an issue escalates. The dashboard and drill down pages provide location color alerts that are intuitive and easy to use. The user may view a polling location for specific information on a single EViD or group of EViDs.

“Election Day and Early Voting are very dynamic environments,” said Mindy Perkins, VR Systems CEO. “With our new WebMonitor, election managers can observe activity across polling locations to catch common Election Day and Early Voting snags. As a result, WebMonitor helps ensure an efficient and positive election experience for the voter.”

Additional features:

- Location based overview allows elections managers to monitor site status, location statistics, wait time and check-in statistics at any time
- Flexible display options support a large display for central office staff in a war room or a tablet design ideal for roving techs
- Web based for use on a variety of devices and mobile environments
- Integrates with Google Maps
- View option based on the user’s preference—either map or list view depending on need

Since 2004, VR’s EViD has remained at the forefront of elections technology with numerous product offerings including the EViD Compact, EViD Edge and EViD software package designed for county elections offices that own or rent their devices, including laptops. More than 14,000 EViDs were in use during the 2016 election season.
