VR Tower☆ from VR Systems has you covered.

VR Systems’ VR Tower☆ are for Election Administrators who want a great website that isn’t a headache.

Our website isn’t just about public relations. Today it’s where we interact with voters, candidates, the press.”

“Exactly. We need a solution that makes communications easy and effective...without consuming more scarce resources.”

“I need to update our website now.”

“Our voters want to request a mail ballot online...or see if the elections office has received their ballot.”

“And they expect more election services on their smartphones.”

Easy-to-Maintain
With just a bit of training, anyone in the elections office can make updates...right away!

Custom Design
For a friendly, accessible look that’s right for your jurisdiction...not some cookie-cutter, generic design.

Good Value
One annual fee covers everything...no extra expenses for design and hosting...budget once and you’re done.

Scalable
To meet the ever-expanding expectations of all your constituencies: voters...candidates...parties...the press.
See what VR Systems’ VRTower™ can do for your office.

Embed your YouTube™ videos on web pages for poll worker training, communications with voters.

Candidate File Distribution
Easily provide absentee voter lists and other reports requested by candidates by posting to their account on your website.

Graphic Design Services
Create a look and feel that’s unique to your jurisdiction and meets your voters’ needs.

Complete Service in a single package:
All VRTower™ features are included in one purchase. Annual renewals and no lock-in to a long contract.

Handy Features
Facilitate communication with the public and the press:
- **Newsroom** (links to press releases by year)
- **Calendar** (upcoming dates and events)

“...It’s a great website and a great platform for us. We get lots of compliments from our voters.”

SUSAN GILL, CITRUS COUNTY SUPERVISOR OF ELECTIONS, FL
Reliable Hosting Services
With our robust cluster of servers, we host your website securely with your current domain name.

Secure: Automatic security updates and firewall protection from hackers. You control who has permission to alter your website.

Powerful: Our bandwidth increases to meet your Election Day demands.

Early Voting Location and Status:
Shows voters maps to your early voting sites, with estimated wait times for voting.

Turnout Statistics at a Glance
Graphs and pie charts show current local voting activity by party and by voting method—mail, early, provisional, and election day. Statistics are pulled automatically from your database. All you do is drop the service onto a webpage.

Voters-on-the-Go
Mobile-enabled version of your website offering essential services such as change of address, voter status, and mail-ballot request.

Absentee-Mail Ballot Request Form
Voters can request mail ballots online and requests flow into your system. No need to rekey the request data when putting on a request.

Election Night Reporting
Quickly post election results as they come in from polling places.
